

Hello,

I'm Roman Riezanov, a Frontend Lead with 5+ years of experience in web and mobile development. I've led frontend teams, designed scalable architectures, and implemented complex UI solutions, while maintaining hands-on involvement in coding. My core expertise is React and its ecosystem (TypeScript, Redux, Next.js), and I also have experience with Vue, Angular, and React Native.

I have mentored developers, optimized performance, and ensured high-quality, maintainable products. I also have about a year of experience with Node.js, which helps me collaborate effectively across frontend and backend.

I'm looking for opportunities where I can combine technical leadership with hands-on development to deliver scalable, performant, and maintainable products.

Best regards,

Roman Riezanov
