Roman
Riezanov
FRONT-END DEVELOPER

- Kharkiv, currently in Bratislava, Slovakia
- +38(050)-933-24-20
- LinkedIn/RomanRiezanov
- @RomanRiezanov
- romark6@gmail.com

SKILLS

- JavaScript (ES6+)
- TypeScript
- React, React Native, Next.js, Vue.js, Angular
- Node.js
- Redux (thunk, toolkit, saga), MobX
- REST API
- HTML5
- CSS3(SCSS, Grid/Flexbox)
- Bootstrap, Tailwind, Sass
- Git / Github / Gitlab, Bitbucket
- Trello, JIRA, Figma
- Docker, CI / CD, SSR
- Cursor AI, GitHub Copilot, ChatGPT

Master's Degree in Electric Power Stations | 2017 - 2019

NATIONAL TECHNICAL UNIVERSITY "KHARKIV POLYTECHNIC INSTITUTE"

Bachelor's Degree in Electric Power Stations | 2014 – 2017

NATIONAL TECHNICAL UNIVERSITY "KHARKIV POLYTECHNIC INSTITUTE"

LANGUAGES

Ukrainian

Russian

English

CERTIFICATION

A-LEVEL: FRONT-END ADVANCED
JULY 2020 – FEBRUARY 2021

SUMMARY

Frontend Lead with 5 years of experience in web and mobile development.
My core expertise lies in React and its ecosystem (TypeScript, Redux, Next.js), but I also have hands-on experience with Vue, Angular, and React Native. I've been involved in building architecture, implementing technical solutions, and developing design systems. As a team lead, I focus on mentorship, process organization, code reviews, and making key technical decisions. Additionally, I have backend experience with Node.js, which helps me bridge the gap between frontend and server-side development. I'm committed to performance, scalability, and delivering high-quality products.

EXPERIENCE

NIKO TECHNOLOGIES | JANUARY 2024 – PRESENT

LEAD FRONT-END DEVELOPER | JANUARY 2025 – PRESENT

- Designed and implemented a scalable and maintainable frontend architecture using modern best practices. Took a leading role in delivering core features, optimizing performance, refactoring legacy code, and enforcing high standards in state management and design.
- Collaborated closely with cross-functional teams to align technical decisions with business goals, streamline development workflows, and ensure timely, high-quality product delivery.
- Built complex UI logic, advanced rendering mechanisms, and smooth animations to deliver a seamless user experience. Owned and resolved critical production issues, ensuring system reliability and responsiveness.
- Led the adoption of AI-assisted development practices by introducing Cursor AI to the team, optimizing day-to-day development workflows and accelerating feature delivery without compromising code quality.
- Supported team growth by mentoring engineers, sharing knowledge, and fostering a collaborative, high-performance development culture, while remaining deeply involved in hands-on coding.

FRONT-END DEVELOPER | JANUARY 2024 – DECEMBER 2024

- Developing dynamic, high-performance web applications using React and implementing responsive and intuitive user interfaces.
- Designing and building e-commerce websites for various products, including game skins, books, and poker courses, ensuring seamless integration of shopping cart functionalities and secure payment gateways.
- Mentored junior developers, providing guidance on coding best practices, conducting code reviews, and facilitating their professional growth.

Technologies: ReactJS, JavaScript, Next.js, TypeScript, Redux, REST API, HTML, CSS, SCSS/Sass, Tailwind, Docker, CI/CD

FRONT-END DEVELOPER - MEMCRAB | DECEMBER 2022 – JANUARY 2024

- Developing and maintaining responsive web applications using React, resulting in improved user engagement and increased performance.
- Utilizing React Native to create mobile applications that deliver a native-like experience on iOS and Android platforms.
- Integrating RESTful APIs to fetch and display dynamic content, implementing data caching and efficient data synchronization.
- Showcased expertise in building reusable React components, contributing to a modular and scalable project structure.
- Implementing state management using React Context and Redux, leading to better organization and scalability of code.
- Diagnosing and fixing complex bugs, improving the overall stability and usability of the applications.

Technologies: ReactJS, React Native, JavaScript, TypeScript, Redux, MobX, REST API, HTML, CSS, SCSS/Sass, Tailwind, Docker, CI/CD

SOFTWARE ENGINEER - RED ROCKET | JULY 2020 – DECEMBER 2022

- Did development and support of applications, expanding the functionality of the real products, which requires the ability to dive deep into the code and architecture.
- Orchestrated the creation of a new website, making a substantial contribution to shaping an innovative and cohesive online project.
- Actively participated in designing and implementing cutting-edge features for the web application, ensuring a modern and user-friendly experience.
- Gained practical experience using the Salesforce platform, expanding skills and deepening knowledge across various technologies.

Technologies: ReactJS, Next.js, Node.js, JavaScript, TypeScript, Redux, Redux Toolkit, Redux Thunk, REST API, HTML, CSS, SCSS/Sass, Tailwind

**CHIEF MANAGER OF THE ELECTRICITY SUPPLY DEPARTMENT –
LTD "ENERGO H" |** AUGUST 2015 – FEBRUARY 2020
